

JA Series Swivel Jacking Casters

Flexello JA Series jacking casters are designed to facilitate movement and quick, accurate adjustment of working platforms, machines, and other applications. Ideal for medium and heavy-duty loads, they feature an electrostatic-sprayed black matte finish.

The JA Series casters are available in sizes ranging from 6" to 10" wheel diameters with load capacities from 880 to 5,500 lbs. (400 to 2,500 kg). The 6" and 8" models have a screw jacking system with a 3" lift independent of the swiveling action. The 10" model has a 6" lift and features a 2-way directional lock with travel at 90° to the vertical fixing plate.

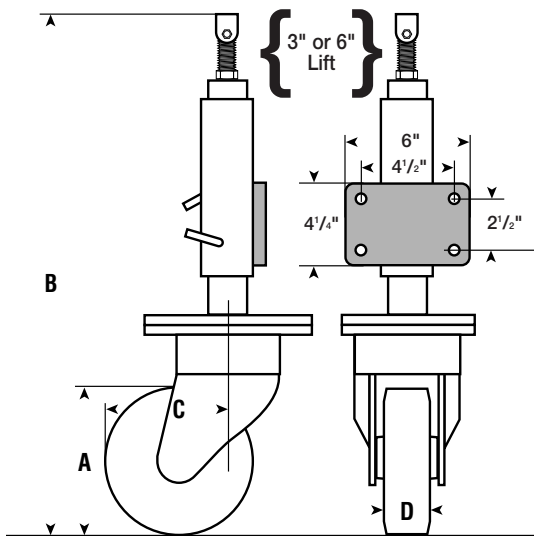

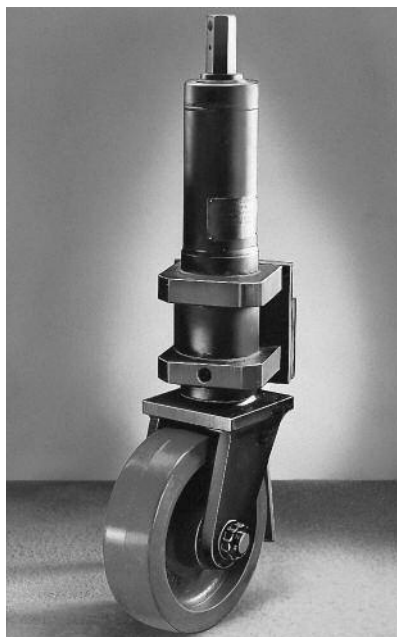

Plate dimensions shown for 6" and 8" diameter models. The bolt-hole pattern for 10" diameter models measures 4" by 4". Consult factory for additional details on 10" models.
